Response To Official Action

AMENDMENTS TO THE SPECIFICATION

Numerous objections regarding errors in grammar and element numbering in the specification have been made by the Examiner in the Official Action of October 20, 2004. Further, the Applicant has made changes to the Figures which necessitate corrections in the Specification. For these reasons and further for the purposes of facilitating printing of the application and easing the Examiner's examination, a substitute specification (clean version) is provided with this response under 37 C.F.R. 1.125 and M.P.E.P. § 608.01(q). Further, the differences between this substitute specification and the original application upon which this CIP is based are also provided and attached (as a marked-up specification) with this Response.

The Examiner is respectfully requested to accept this substitute specification as the official version of this application including all changes presented thereto. No new matter has been introduced in the substitute specification.
